## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. *Claims 1-10*, drawn to a system and method for sharing information in data processing, classified in class 707/1.
  - II. *Claims 11-24*, drawn to a system and business method for online checkout process, classified in class 705/1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP ' 806.05(c)). In the instant case, the combination as claimed does not require the particular of the subcombination as claimed because the system and method for sharing information in data processing and file management can be facilitate without an online checkout process. The subcombination has separate utility such as enabling a user to order from a plurality of service providers.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2143

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Jeffrey Pwu, whose telephone number is (571) 272-6798.
